Itinerary disclaimer

The itinerary is the strongest part of our trip. Stick to it and you will have little altitude related illness problems, go one day harder and you can be in big trouble. In our decade long experience as a guide and leader, we have tested these programs out several times. Sometimes they will seem slow but it's about enjoying the trip not pushing hard and having a headache all day. You need a very good reason to go faster. Going slower is Ok, just watch your overall progress. Shifting up one day instead of having a rest day can mean headaches and you then have to have a rest day later anyway!

Every effort will be made to keep to the above itinerary, but as this is Adventure Travel in a remote mountain region, we cannot guarantee it. Weather conditions and the health of climbers can all contribute to changes. The trek Leader/Guide and cook will try to ensure that the trip runs according to plan, but an easy going nature will be an asset! Issues that result in changes to trip finish dates, hotel or air tickets requirements etc need to be communicated to grand Himalaya HQ ASAP.

Furthermore, our Trip Notes is a general guide to the trek and region we are going to visit. Any mention of specific destinations or flora and fauna is by no means a guarantee that they will be visited or come across.

What to take

This is a very active trip, meaning you will be on the move most of the time, so pack as lightly as possible. Please note that between every 2 members there will be 1 porter/mule and your trekking gear will be carried by the porter/mule in a water-proof duffel bag that we will provide you. The maximum the porters/mule is allowed to carry in Nepal is 30 Kg/22lbs, which means the average weight of each member's duffel bag shouldn't exceed 15Kgs. Besides, the airlines company that flies to the trekking areas of Nepal has a similar policy of allowing 15Kgs of luggage and 7Kgs of hand baggage for free, for every passenger. Some of your luggage can be left in Kathmandu (the hotel may charge a storage fee), but you will need to take all your trekking gears with you.

Be a safe Trekker

1. Keep your eyes on your team mate while trekking and try to cohere with the group at all times. Trekking tracks in the Himalayas are often connected with caravans and nomads trail, trails to the villages nearby the trekking route, domestic and wild animals trail, etc. These off the trekking track can often mislead you and consequently, people could wander off the track towards the hazardous door.
2. Try not to ascent rapidly especially first few days of the trekking, no matter how physically tough you are. I presume trekking in the Himalayas is entirely different than trekking in the Alps and Andes. Keep your eyes all around you when trekking because there is an utmost possibility of seeing wild lives and some other interesting sites, rather than speeding up towards the next camp and end up holding your heads rest of the day.
3. Drink plenty of plain fluids at least 4 liters a day. Keeping yourself hydrated after day's exhaustion is a must which can prevent you from having AMS (Acute Mountain Sickness). Avoid drinking alcohol once you hit high altitude, which is above the altitude of 3500 meters. Make yourself habit of drinking water, tea, soup, juice and so on, instead of alcohol. Drinking alcohol at high altitude has been scientifically proved to be making your body more susceptible to AMS.
4. Make sure you do not overload your daypack as this could cause pain to your shoulders/back. The heaviest item in your daypack should be your water, so your daypack should get lighter as the day goes on. If your daypack feels uncomfortable at any point, stop and readjust it.
5. Ensure that your feet and other extremities are kept warm and dry at all times. There have been cases of people not adequately dressed getting frost bite at high altitude due to the freezing temperatures. Remember, although the temperatures at the top may not seem cold, wild chill can reduce this temperature even further. Always be prepared with something to cover your face, warm gloves and thick walking socks.
6. We advise that you take some plasters/a blister prevention kit with you to keep your feet in good condition. Don't lace your boots too tightly/loosely and if they feel uncomfortable readjust them and apply plasters when necessary.

7. Keep your head torch in your daypack, always. You never know when and where you end up walking in the dark.
8. Walking poles can aid your trek, providing additional support and balance. Walking poles also helps to significantly reduce knee strain, particular during decent.
9. Your guides and sherpas are very much experience about the places you are trekking. So we always recommend you to follow their instructions and help yourselves by helping them to create a magnificent plus successful trip.

We the entire family members of Grand Himalaya would like to wish you safe and successful trips.

Important to note

- Please read the 'Checklist' section of this trip notes for additional details of what you need to bring for the trek on this trip.
- You will need to bring a comfortable medium sized day pack to carry the things that you will need during the day. This should have a waist strap or (better) a padded waist belt.
- The weather is subject to change in high altitude so layered clothing is recommended throughout the year.
